Front End Developer Resume Profile

★★★★★ **4.00**/5 (Submit Your Rating)

SUMMARY:

- Developed **Web 2.0** applications to consume **JSON** response using callback functions.
- Good work experience in writing **SQL queries** with major Relational Databases.
- Experienced in writing **PL/SQL queries, T-SQL, SQL Server 2005/2008, Oracle 9i/10g and MySQL5.**
- Around 7 years of strong development experience in User Interface applications and integration of highly transactional and scalable applications.
- Very Strong in developing applications using **HTML5, HTML, CSS3, XML, DOM Manipulation, JavaScript, jQuery.**
- Experience in Core Java, Servlets, JSP, **JavaScript, CSS, HTML**, JDBC technologies and backend technologies like java and Dot Net.
- Experience in database development skills like MySQL, Oracle.
- Developed Object oriented code and worked with JavaScript validation.
- Proficient in developing front-end systems with JavaScript, JQuery, Ajax, Bootstrap, HTML5, CSS3 and JavaScript frameworks such as **AngularJS.**
- Proficiency in server-side Java development with exposure REST web services, AJAX powered web applications.
- Resolved complex issues related to browser and network performance, cross-browser and legacy IE compatibility, client-side scaling, data modeling, usability and testability.
- Used the best practices of SDLC as well as Agile/SCRUM methodologies.
- Experienced in **Twitter Bootstrap framework.**
- Experience in all phases of software development life cycle **SDLC** , which includes User Interaction, Business Analysis/Modeling, Design/Architecture, Development, Implementation, Integration, Documentation, Testing, and Deployment.
- Close communication with development team that included Java developers and front-end designers to ensure that the user interface remained true to spirit in all aspects.
- Good Knowledge on **multi-threading, bootstrap and Fuel UX.**
- Excellent communication, analytical, interpersonal, problem solving and presentation skills.

TECHNICAL SKILLS:

○ **Web Development:**	○ HTML5, SASS, CSS3, JavaScript, JQuery, PHP, JSON, JQUERY, AJAX, XML

○ Databases:	○ MySQL ,ORACLE
○ Programming Languages:	○ C, C , java, data structures, C .NET, ASP.NET, VB.NET
○ Operating System:	○ Windows, Linux, Unix, MS-DOS
○ Software Tools:	○ Microsoft Visual Studio,Dreamweaver
○ IDEs worked on:	○ Eclipse
○ Frameworks:	○ Angular
○ Application Servers:	○ Apache Tomcat Server

PROFESSIONAL EXPERIENCE:

Confidential

Sr. Front End UIDeveloper

RESPONSIBILITIES:

○ Working as a Senior UI Developer, assisting my team in developing two different Web-based applications.

○ Used the functionalities for writing code in **HTML5, CSS, AngularJS, JavaScript, JQUERY, Ajax, JSON,** and **Bootstrap** with **MySQL** database as the backend.

○ Refactored and enhanced an existing **AngularJS application** to follow strict MVC patterns for improved source code maintenance which resulted in 40 code reduction, ease of upgrade, scalability, ease of developer spin up and enhanced performance.

○ Brief experience on implementing the **AngularJS** in creating animations based on CSS classes.

○ Used **AngularJS** as framework to create a **Single Page Application** SPA which can bind data to specific views and synchronize data with server.

○ Create, edit and maintain sites implementing **responsive design themes** using front end development frameworks including **Bootstrap.**

○ Made enhancements to existing **CSS and DIV** tags, made upgrades using Twitter **Bootstrap** model.

○ Used **Bootstrap** front-end framework for faster and easier web development.

○ Experienced in all phases of **UI/UX** implementation of a Travel Search and Booking web application including Design, Prototyping, Development and Testing phases.

○ Extensively used **Selectors in JQuery** for updating content on **DOM** nodes.

○ Worked through cross browser compatibility issues with layout and styles for all new **CSS** that was implemented.

○ HTML5 and CSS3 latest tags are used to design the webpages and HTML local storage web applications are used to store data.

○ Met with the project manager frequently for reviewing project goals and for creating proposals for future developments and researching their fields for UI design.

○ Styling pages with **CSS3.0** and developed **JavaScript** for user interfaces.

○ Used **Eclipse IDE** for **designing, coding** and **developing** applications.

○ Implemented JavaScript source code, embedded nested handling logic using JQuery event handlers and call back functions.

○ Created a CSS framework for using a 12 column grid preferred by the designers as well as implementing parts of Object Oriented **CSS** to cut down on repetitive code.

○ Worked on various two different projects writing **HTML, CSS** and JavaScript based on provided designs to get web sites and web applications built within a team atmosphere.

○ Worked through cross browser compatibility issues with layout and styles for all new **CSS** that was implemented.

○ Refine and iterate user experience by designing and implementing new modules and interfaces in a complex, responsive site.

○ Involved in a Waterfall based approach to UI Development.

Environment: HTML5,CSS3,SASS,JavaScript,JQuery,AngularJS,Bootstrap,XML,J2EE, JSP, Apache Tomcat, Eclipse, Oracle, Microsoft Azure, Tortoise SVN.

Confidential

Front End UI Developer

RESPONSIBILITIES:

○ Facilitated **User Testing** sessions to solicit feedback on prototypes.

○ Participated in development of a new business application for the layout using Grid orientation model **Bootstrap** framework.

○ Built Rich Prototypes and Applications using **HTML, CSS, JavaScript, JQuery, Ajax, JSON, AngularJS and Bootstrap with MySQL database.**

○ Developed Object Oriented JavaScript code and responsible for client side validations using JQuery functions.

○ Developed source code to consume **JSON** response received through **XHR/AJAX** calls using **JQuery. Ajax** calls.

○ Implemented **AngularJS** application to follow strict MVC patterns for improved source code maintenance.

○ Integrated the **frontend JQuery UI** with **backend REST API.**

○ Built responsive site using **Bootstrap** that fits devices of different visual sizes.   ∧

○ The tech stack is **AngularJS**, LESS, **Bootstrap** and cutting edge server side technologies.

○ Involved in Designing, Implementation, Maintenance and Testing of Databases and Web pages.

○ Coding, styling, testing of reusable **JavaScript, CSS, HTML widgets** / libraries for **complex UI controls.**

○ Responsible for **JavaScript / AJAX UI** upgrades and improvements.

○ Designed web pages using with HTML, CSS based on the **W3C** standards.

○ Worked through cross browser compatibility issues with layout and styles for all new CSS that was implemented.

○ Tested **cross browser functionality** and fixed major layout bugs for supported browsers including IE6.

○ Developed and prepared test cases for unit testing with **JUnit.**

○ Wrote the backend to modify the tags in the database using **JSON** for data transmission.

○ Tested cross browser functionality and fixed major layout bugs for supported browsers including IE6.

○ Developed the **UI using SWT** to **add/remove** tags.

○ Developed callback functions to parse and handle **JSON** data returned from the server.

○ Designed user friendly navigation for displaying various sections of data using JQuery.

Environment: HTML, CSS, SASS, JavaScript, JQuery, Bootstrap, XML, MV Framework, AngularJS, Apache Tomcat, Notepad , Sublime text, IntelliJ, MySQL, Microsoft Azure, Tortoise SVN.

Confidential

Front End Developer

RESPONSIBILITIES:

○ Handled all aspects of the web application including maintaining, testing, debugging, deploying and printing.

○ Wrote **SQL** queries to get the data, update the data from the database and to connect database in the **DAO** implementation classes.

○ Used **Log4J** for logging, debugging and monitoring.

○ Developed web presentation layer using **JQuery, HTML** and **CSS** according to internal standards and guidelines.

○ Worked with teams where requirements are constantly being implemented, tested and improved.

○ Involved in developing a user centric market driven site redesign.

○ Involved in development converting the **static HTML mark-ups to JSP's using JSTL.**

○ Worked on various two different projects writing **HTML, CSS** and **JavaScript** based on provided designs to get web sites and web applications built within a team atmosphere.

○ Used **Angular.js, JQuery, JavaScript, HTML, and CSS** for front end web designing.

○ Implemented various Employee Self Service front end UI Applications developed for easy lookup and creation of HR Records for various Employees.

○ Used MVC architecture of backbone.js to convert nested jQuery calls into a backbone model based architecture.

○ Created Dynamic Web Pages using Web Controls.

○ Styling pages using CSS3.0 and developed JavaScript for user interfaces.   ⌃

○ Designed, developed and implemented the database in Microsoft SQL Server for the application

○ Built html templates for high traffic and complex data driven websites.

Environment: HTML, CSS, Angular.js, Bootstrap, AJAX, JQuery, MySQL, JavaScript, Eclipse, JSON, Rest Web Services.

Confidential

Role: Front End Developer

RESPONSIBILITIES:

○ Debugged all look and feel issues in the target browsers, in conjunction with quality assurance.

○ Built **html templates** for **high traffic** and **complex data driven website**.

○ Participated in all phases of development, analysis, design, program analysis, programming, debugging, testing, documentation, delivery and implementation.

○ Created branding in the **web UI front end** using CSS classes.

○ Worked with the business analysts to develop High-level Document and Detailed level Document for various UI modules.

○ Worked on **C** for writing classes and developing the **web parts** by using visual studio.

○ Involved in all phases of **UI/UX** implementation of a **Travel Search** and **Booking web application** including **Design**, **Prototyping, and Development and Testing phases.**

○ Implemented Web services so that our clients can access it to get the required information based on the customer information provided.

○ Designed Web User Interface with User Controls.

○ Analyze, design, implement and integrate functional requirements in the solutions.

○ Used DIV tags and positioned the elements appropriately as per client requirements.

○ Developed Page layouts, Navigations and presented designs and concepts to the clients and the management to review.

Environment: HTML, CSS, PHP, VS 2005, 2008, .Net Framework v3.0, C .net, ASP.net, VB.net, SQL Server 200

Confidential

Front End Developer

RESPONSIBILITIES:

○ Used HTML, CSS, and JavaScript for the front end designing.

○ Responsible for understanding functionality at client side and knowledge transfer.

○ Cleaned up and rewrote front end HTML and CSS to meet validation requirements.

○ In addition to code development, maintained project documentation and assisted in application design.

○ Implemented the project and fixed the bugs in the module.

○ Handled PHP backend development for dynamic database driven website.

○ Interacting with the project leaders, team leaders, designing and developing web pages, animations, still graphics, banners, greeting cards, logos etc.

○ Involved in documenting the details related to Changes occurring in the system, following the Quality processes.

○ Created job details, activity diagrams, test cases and communicated with the client on a regular basis.

○ Conducted data prep activities for system testing, regression testing end to end testing using **MySQL** 3.5.

○ Worked closely with Program Engineers how the front end and back end mechanism works in order to develop an interface.

○ Involved in documenting the details related to Changes occurring in the system, following the Quality processes.

Environment: VS 2005, 2008, JavaScript, jQuery, C .net, ASP.net, VB.net, SQL Server 2005, HTML, CSS, PHP.
